Atharva Suryawanshi

suryas.atharva18@gmail.com | +91-7387040118

EDUCATION

SYMBIOSIS INSTITUTE OF TECHNOLOGY
B.Tech in Computer Science and Engineering
Grad. 2028 | Nagpur, India
Cum. GPA: 7.4

COURSEWORK

UNDERGRADUATE

Data Structure and Algorithm
Operating System
Data Base Management System
Theory of Computation
Design and Analysis of Algorithm

SKILLS

PROGRAMMING

C • Python • Java
JavaScript

DEVELOPMENT

Node.js • React.js

DATABASE

MySQL • MongoDB

TOOLS

Git

HOBBIES

- Guitar
- Cycling
- Table Tennis

EXPERIENCE

INFOCEPTS TECHNOLOGIES | Software Engineering Intern
Nagpur, MH | May 2026 – July 2026

- Engineered an in-browser high-performance data analytics dashboard using React.js and SheetJS, optimizing data parsing pipelines to achieve a 95.9% speed improvement and 87% reduction in memory usage.
- Developed a full-stack document tracking web application featuring a multi-stage approval workflow, Role-Based Access Control (RBAC) across 4 user personas, and automated audit trails.
- Architected a decoupled microservices infrastructure using React frontend, Node.js and Python (FastAPI) middleware, and a MySQL database to enable secure, end-to-end operational automation[cite: 1].

PROJECTS

CSR DATA ANALYTICS & NGO COMPLIANCE PLATFORM

React.js, Node.js, FastAPI, Python, MySQL, SheetJS, Recharts

- Engineered an in-browser analytics dashboard utilizing React.js and SheetJS, implementing a memory-safe parsing pipeline that optimized initial parse times by 95.9% and reduced heap allocation by 87%.
- Developed dynamic multi-column filtering, global text search, automated summary statistics (sums, medians, averages), and interactive data visualization using Recharts.
- Built a full-stack NGO/Vendor document compliance tracker featuring a 4-stage verification workflow (PAN registration to Form 10BE utilization) using React, Node.js, and FastAPI.
- Implemented Role-Based Access Control (RBAC) across 4 user personas (Admin, Approver, User, Viewer) with secure REST APIs and MySQL persistence for end-to-end grant verification auditing.

HOTEL BOOKING WEB APPLICATION

React.js, React Router, Tailwind CSS, Node.js, Express.js

- Built a full-stack hotel booking platform with a React frontend and a Node.js/Express.js backend.
- Designed and implemented a MongoDB database schema for storing user data.
- Developed complete user authentication system including registration, login, and OTP-based password recovery.
- Built multi-step UI flows with dynamic state management using React hooks, ensuring a smooth and responsive user experience.

TEXT CLASSIFICATION

Sentiment Analysis using pre-trained models

- Extraction of emotional insights from text data, in areas such as social media monitoring, customer feedback.
- The proposed approach utilizes advanced pre-trained transformer models, such as BERT or RoBERTa.

CERTIFICATIONS

- Artificial Intelligence and Machine Learning
- Python Programming(RHA)
- Data Structure and Algorithm(Infosys SpringBoard)
- System Administration(RHA)
